Industrial cooling water or unpolluted waters may be discharged, on approval of the Approving Authority, to a storm sewer, combined sewer, or natural outlet.

3. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes

if it appears likely in the opinion of the Approving Authority that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Approving Authority will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment system, degree of treatability of wastes in the sewage treatment facility, and other pertinent factors. The substances prohibited are:

(a) any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas;

(b) any waters or wastes containing toxic and/or poisonous solids, liquids, or gases that inhibit or interfere with the biological treatment process;

(c) any liquid or vapor having a temperature higher than one hundred and fifty (150) degrees Fahrenheit;

(d) any liquid wastes containing solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails, paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders;

(f) any waters or wastes containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100 mg/l) or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and ninety (90) degrees Fahrenheit;

(g) any waters or wastes containing free or emulsified oil and grease when, in the opinion of the Approving Authority it appears probable that such wastes:

(i) can deposit oil or grease in the sewer lines in such manner as to clog the sewers or impede the flow,

(ii) are not amenable to biological oxidation and will, therefore, pass to the receiving stream without being affected by normal sewage treatment processes,

(iii) can overload the sewage treatment facility's grease handling equipment,

(iv) can have deleterious effects on the sewage treatment process due to excessive quantities or concentrations;

(h) any waters or wastes exerting biochemical oxygen demand (BOD) greater than two hundred forty (240) mg/l;

(i) any waters or wastes exerting a chemical oxygen demand (COD) greater than four hundred (400) mg/l;

(j) any waters or wastes having a suspended solids concentration in excess of three hundred (300) mg/l;

(k) any radioactive wastes or isotopes of long half-life (over 100 days) without special permit. The radioactive isotopes ^{131}I and ^{32}P used at hospitals are not prohibited if properly diluted at the source;

(l) any waters or wastes exerting an excessive chlorine requirement;

(m) any garbage that has not been properly shredded. The installation and operation of any garbage grinder shall be subject to the review and approval of the Approving Authority;

(n) any waters or wastes exerting or causing excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions);

(o) any waters or wastes containing phenol or other taste or odor producing substances in such concentrations as to affect the taste and odor of the receiving stream after passage through the sewage treatment process;

- (a) reject the wastes,
- (b) required pretreatment to an acceptable condition for discharge to the public sewers,
- (c) require control over the quantities and rates of discharge, and/or
- (d) require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of paragraph 9 of this Section.

6. When required by the Approving Authority, the owner of any property serviced by a City sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the City sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely lo-

cated, and shall be constructed in accordance with plans approved by the Approving Authority. The manhole shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times. Plans for such manholes for the installation of control and related equipment must be approved by the Approving Authority before construction is begun.

7. All measurements, tests, and analysis of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, samples shall be taken at a final discharge point inside the industry or the nearest downstream manhole in the public sewer. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. The particular analysis involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composite of all outfalls, whereas pH's are determined from periodic grab samples.

8. Until an adequate analysis of a representative sample of the customer's waste has been obtained, the Approving Authority may, for the purposes of this ordinance, make a determination of the character and concentration of the waste by using data based on analysis of similar processes or data for this type of business that is available from the Water Pollution Control Commission or the United States Department of the Interior, or from industry-recognized authoritative sources.

9. No statement contained in this Section shall be construed as preventing any special agreement or arrangements between the City and any user or group of users.

SECTION 5. PROTECTION FROM DAMAGE

1. No unauthorized person shall maliciously, willfully,

or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

SECTION 6. POWERS AND AUTHORITY OF INSPECTORS

1. The Approving Authority and other duly authorized employees of the City of Petal bearing proper credentials and identifications shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this ordinance. The Approving Authority or his representative shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

2. While performing the necessary work on private properties referred to in Section 6, number 1, above, the Approving Authority or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City of Petal's employees and the City shall indemnify the company against loss or damage to its property by City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 4, paragraph numbered 6.

3. The Approving Authority and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City of Petal holds a duly negotiated easement for the purpose of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining

to the private property involved.

SECTION 7. PENALTIES

1. Any person found to be violating any provision of this ordinance except Section 7 shall be served by the City of Petal with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2. Any person who shall continue any violation beyond the time limit provided for in Section 7, paragraph numbered 1, shall be guilty of misdemeanor, and on conviction thereof shall be fined in the amount not exceeding three hundred dollars (\$300.00) for each violation. Each day in which any such violation shall continue shall be deemed a separate offense.

3. Any person violating any of the provisions of this ordinance shall become liable to the City of Petal for any expense, loss, or damage occasioned the City by reason of such violation.

SECTION 8. HEARING BOARD

1. The Hearing Board shall consist of the Mayor and Board of Aldermen of the City of Petal, Mississippi, and shall arbitrate differences between the Approving Authority and sewer users on matters concerning interpretation and execution of the provisions of this ordinance by the Approving Authority.

SECTION 9. That due to the recent acquisition of the assets and the assumption of the liability of the East Forrest Utility District, and due to the financial condition of said utility district and the City of Petal, Mississippi, this Ordinance shall take effect and be in full force from and after October 1, 1977.

SECTION 10. That if any section or part of this Ordinance shall be found to be unauthorized or unconstitutional, by any court of competent jurisdiction, it shall not affect the remaining sections of said Ordinance.
