Re: Valuations placed on Building Construction for permitting purposes

For several years now our building permit fees have been based on a "Building Valuation Data Sheet" compiled by the SBCCI Plan Review Department produced April 2, 1992. (Copy Enclosed). You will note that the chart has a "Good" Column and a "Average" column which reflects the broad range of construction values. We have always used the "Average" column in order to keep the fees low so as not to discourage builders from building here.

Because of the huge increase in construction over the last 2 1/2 - 3 years due to the housing demand in particular, I feel we need to update our "valuation Data Sheet" to the March 31, 1998 chart. (Copy enclosed)

Contractors figure-in permit fees when they bid for jobs. If these fees are not collected by the City the contractor keeps them. The financing of this department as far as possible should be from permit fees and not from taxation.

Example of fee increase using the 1998 chart on a typical single family dwelling.

1797 Sq. Ft. Home

1308 heated and 489 unheated

1992 chart

valuation - 54,264

permit fee - \$146.50

1998 chart

valuation - 73,041

permit fee - \$184.50

Difference \$38.00

Remember the consumer pays the fee anyway. It's just a matter of who keeps the fee, the contractor or the City.

Unless you have an objection I will begin using the 1998 Chart September 1st, 1998.

Dan Tolbert
Building Official
