PUBLIC WORKS DEPARTMENT

ACTION ITEM: Will Serve Request for Teton County Transfer Station (RP05N46E306001)

PURPOSE
Consider the Will Serve sewer request from Teton County for the Teton County Transfer Station.

SUMMARY
The Teton County Transfer Station located a 1088 Cemetery Road has been connected to the city sewer system since the mid-2000's, when the transfer station was constructed. The county is proposing to expand the transfer station and construct an administration building. Neither the city or the county could locate a Will-Serve from the original facility, therefore a sewer will-serve request is brought before council to address the current connection and the proposed connections.

The number existing, proposed and future bathrooms equate to approximately three EDU's.

STAFF ANALYSIS
Staff supports this sewer will-serve as it cleans up an existing connection and allows the Teton County Transfer station to expand and serve the community.

The facility is not connected to the city water system.

MOTION (Rosenberg's Rules of Order)

1. Move to approve the Sewer Will-Serve for the Teton County Transfer Station at 1088 Cemetery Road with the following conditions:
    a. The approval is for a maximum of 3 EDU's
2. Discussion
3. Move to amend (to add or modify approval conditions) or move to table
4. Move the previous question (to limit debate)
5. Vote
