(i) Charges for winter months (January and February billing periods):

~~(A)~~ Customer service charge per bill rendered, per month ..... \$6.00

A customer that has not established an individual winter maximum shall use the wastewater system average residential winter maximum, provided, however, that the winter maximum shall never be less than 1,000 gallons. The general manager for utilities or his/her designee may adjust the customer's winter average in extraordinary circumstances.

8. Where wastewater meters are required by the city or requested by the customer, the customer shall pay to the city a monthly charge based on the cost to the city of all operation

6 calculations contained in policies approved by the city commission.
- 7 d. Rates for excess strength wastewater (§ 27-169):
- 8 1. A customer discharging excess strength wastewater into the city's wastewater system shall

16 normal strength wastewater charges in addition to excess strength charges calculated  
17 according to the following formula:

$$[Y/X - 1] \times [Z] \times [0.5 \times A]$$
- 19 Y = Measured concentration of wastewater constituent.
- 20 X = Concentration of constituent in normal strength wastewater.
- 21 Z = Thousands of gallons of excess strength wastewater discharge into  
22 the city's wastewater system.
- 23 A = Normal strength wastewater rate per thousand in c.5(i) above.
- 24 Note: Excess strength charges shall be applicable only to the following conventional  
25 constituents: COD, BOD, total suspended solids, nitrogen and phosphorus. When COD is  
26 indicative of the excess wastewater strength, it shall be the preferred measurement  
27 parameter. Where the wastewater contains no more than one excess strength constituent,  
28 the charge shall be based on the constituent which results in the greatest charge.
- 29 e. Rates for septic tank and portable toilet waste (§ 27-169): Septic tank and portable toilet waste
