Changes or adjustments.

Based on the Public Utility Commission's rule regarding overbilling and underbilling, contained in title 16, Texas Administrative Code, section ~~[, Chapter 24, subchapter E,]~~ 24.87(h)

~~[Overbilling and underbilling]~~. "If billings for utility service are found to differ from the utility's lawful rates for the services being provided to the customer, or if the utility fails to bill the customer for such services, a billing adjustment shall be calculated by the utility. If the customer is due a refund, an adjustment must be made for the entire period of the overcharges. If the customer was undercharged, the utility may backbill the customer for the amount that was underbilled. The backbilling may not exceed 12 months unless such undercharge is a result of meter tampering, bypass, or diversion by the customer as defined in §24.89 of this title (relating to Meters). If the underbilling is \$25 or more, the utility shall offer to such customer a deferred

payment plan option for the same length of time as that of the underbilling. In cases of meter tampering, bypass, or diversion, a utility may, but is not required to, offer a customer a deferred payment plan.”

(a) Adjustments

Rates and charges described in sections 31-138 are set by action of the city council of the city. Any changes or adjustments to those rates are prohibited unless approved by the city council, except in the event that there is a clear error in calculation or meter reading. The Utility Director or his designee may, in the case of a clear error of calculation or meter reading, allow certain adjustments of amounts billed if sufficient evidence is presented by the customer.

Any adjustments will be based on the Public Utility Commission's rule contained in section 24.87(h) of title 16 of the Texas Administrative Code ~~{Chapter 24, subchapter E,(h)}~~.

(b) Back Billings/Under Billings

Any adjustments will be based on the Public Utility Commission's rule contained in section 24.87(h) of title 16 of the Texas Administrative Code ~~{Chapter 24, subchapter E,(h)}~~.

Sec. 31-138.2. – Fire Protection Fees For Fire Protection Tanks

Annual Inspection Fee.....\$30.00

Refilling of fire protection tanks will be charged as bulk water as established under Section 31-139.

Sec. 31-138.3 Connection Fees For Temporary Construction Meters

TEMPORARY CONSTRUCTION METERS (RESIDENTIAL AND COMMERCIAL)

Before requesting a temporary construction meter, a plumbing permit must be obtained from the Building Department. The Utilities Department will approve the sizing of the temporary construction meter(s) based on required flow rate submitted by customer or customer representative at the time of the request for the development. In addition, for commercial meters, an appropriate backflow preventer must be registered with the Utilities Department and then installed by the customer at the location. For commercial locations, if a plat approval has not been issued, then the request for a temporary construction meter will be forwarded to the Utilities

Department for review and approval in order to ensure that the bacteriological and pressure tests are in compliance. The person desiring such meter shall first make an application and payment of fees (water availability, deposit, meter and meter installation) with the Utilities Department under section 31-138.1 and 31-141. The meter will be read and billed for water only during this period based on the current rates

Temporary Construction meters shall be allowed for **no longer than six months for residential and no longer than 9 months for commercial construction**. During these time frames, if a Certificate of Occupancy (CO) from the Building Department is obtained, the temporary construction meter would become a permanent meter and all costs of services will be added to the bill (sewer, garbage, federal/state mandates, stormwater, tax and any other fees approved by City Council). The meter shall be installed, read and finally removed, if needed, by Utilities' employees only. It is illegal to remove or replace the meter by any person other than a Utilities Department employee and is subject to an illegal connection fee as established under Section 31-133 (e).

Sec. 31.138.4 – Refund of Security Deposits.

(a) A refundable security deposit for utility services is required from all customers according to section 31-138.1.2.

(b) For the purpose of this section “unsatisfactory credit history” means, according to the city tax department records, that utility service has been cut off more than once for nonpayment within the previous two (2) years or a bill has been left unpaid after any previous service was discontinued or there are balances overdue on any utility and paving contract and liens for forced lot cleaning or demolition are due to the city.

(c) The city shall review customer’s payment histories in April of every year to determine eligibility for a one-time security deposit refund in the amount of thirty dollars (\$30.00) when a customer has met all of the following conditions:

(1) The account is on a residential meter; and

(2) The account currently has a utility security deposit posted in the amount of one hundred dollars (\$100.00) or greater; and

(3) The customer has been receiving utility service for more than twelve (12) continuous months; and

(4) The customer has a good credit record of paying in thirty (30) days from the date of billing or less every month in accordance to the city tax department records; and

(5) The customer's service has not been cut off more than twice during the past two (2) years or less for nonpayment of a bill; and

(6) The customer is current on all utility and paving contracts and has no liens for forced lot cleaning or demolition due to the city.

(d) Customers eligible for refunds will receive their refunds according to the following guidelines:

- (1) Any refund of a portion of the security deposit will normally be credited to a customer's May bill. If the deposit is greater than the outstanding bill, the credit may be applied to the customer's next monthly bill.
- (e) All sums of money collected as cash deposit securing the utilities department against losses that may be sustained when a customer discontinues his/her utility services shall be deposited in a special fund to be used for the payment or adjustment of final amounts due the city for utility service when the account is being closed.
- (f) If a person makes a deposit and becomes insolvent or bankrupt, or makes an assignment for the benefit of the person's creditors, the city shall apply the person's deposit to offset the outstanding bill.
- (g) Any customer who has a posted security deposit of less than one hundred dollars (\$100.00) because of a refund, senior citizen reduction, transfer reduction, a prior ordinance or other reason, but subsequently develops an unsatisfactory credit history, may be required as a condition for continuing utility service to post a security deposit in the full amount currently charged to new applicants.

Sec. 31-139. - Bulk water rates.

Bulk water is used in residential and commercial construction for the testing of the water lines.

- (a) General requirements.
- (1) Without prior permission of the utilities department, no water may be removed from the city water system, except by the city fire department for firefighting purposes or the city water department.
  - (2) No water shall be removed from the city water system unless it is dispensed by a device approved by the city.
  - (3) The city makes no guarantees regarding the quality of water after it leaves the city water system, and persons purchasing bulk water agree to hold the city harmless regarding water quality if it is removed from the city's water system.
  - (4) The utilities director or his designee may at any time halt the sale of bulk water.
- (b) Bulk water categories and rates. Thirty dollar (\$30.00) administrative fee.
- Potable water category (rate per 1,000 gallons up to 53,750 gallons) ..... \$ 8.00
- Anything above the fifty-three thousand seven hundred fifty (53,750) gallons will be charged as commercial water rates as established in water rates, section 31-138.
- Effluent water category (rate per 1,000 gallons) ..... \$ 4.00

Sec. 31-140. - Fire hydrant meters.

- (a) *System connection and water use.* The city's utilities department issues on-location fire hydrant meters for water usage on projects to contractors/customers on a short-term basis. Water taken from fire hydrants may be used only for non-potable, non-recreational purposes within the utilities department service area. The use of non-potable water taken from fire hydrants for swimming pools is prohibited. Fire hydrant meters may not be used for long-term irrigation or other uses where a permanently installed meter would be appropriate. No garden hose adaptors will be allowed to be connected to the two (2) inch fire hydrant meter. The utilities director may remove any fire hydrant meter due to pressure issues.
- (b) *Application process and inspection.* The contractor/customer shall submit the applicable fee and complete a fire hydrant meter application stating the exact location for the meter installation. The applicant shall provide the reason for the meter and an approximate time frame the meter will be in service. At the conclusion of each and every project, it will be necessary to finalize the meter reading. Upon request, the application will be updated for the new project location, time frame and transferring of applicable fees. The use of a meter other than what is indicated on the application shall cause the meter to be confiscated immediately. The contractor/customer must use a city meter and pay any and all applicable fees. Failure to comply with one (1) or more of the terms and conditions shall be cause for terminating the permit. Under a standard fire hydrant meter permit, the applicant may request the use of any fire hydrant from the utilities department's designated network fire hydrants. The utilities department staff will review such requests on a case by case basis and a decision shall be issued within five (5) business days of receiving the request. ### SUBJECT

**2018-O-026** Amending Chapter 31 (Utilities), Article III, (Water), Division 3 (Rates and Charges) section 31-138 (Water rates) by adding a fixed monthly water demand fee based on meter sizes as stated in table 4 (from \$1 to \$50 based on meter size); amending section 31-138.1.1 (fees) by implementing new account connection fees for same business day service (from \$35 to \$75 based on the need for meter setup); amending section 138.1.2 (service charges) by adding fees for installation of tee-connections, reducing the water tap fee for irrigation meters, amending the cost for 2" waterline extensions for service connections if needed, deleting the meter and meter installation fee for 5/8" meter, and reducing the security deposits for new customers who are 65 years or older and veterans; creating section of 31-138.4 (refund security deposits); amending section 31-141(b) by reducing the connection fees for residential services to a flat rate, adding a water connection fee for residential services to the Colonias, and reducing the connection fees for 8" commercial meter, amending section 31-141(f) by including the water demand fees; deleting section 31-141.1.1 (security deposits); providing for severability; providing this ordinance shall be cumulative; providing for publication; and providing an effective date.

### PREVIOUS COUNCIL ACTION

The ordinance was introduced by the City council on January 24, 2018.

### BACKGROUND

The cost of water rights was \$720/ac-ft in 1996 and \$3000/ac-ft in 2015. City needs to acquire more water rights to meet the future demands and staff is recommending to implement a fixed monthly demand fees based on the meter size to generate additional revenue to additional water rights. Currently the only revenue collected during platting and meter connection fees are close to \$1.0 million which can only provide additional 300 ac-ft of water.
