SECTION 47-13. ~~DOWNTOWN~~ REGIONAL ACTIVITY CENTER DISTRICTS

Sec. 47-13.1.1. List of Districts - Downtown.

- A. City Center (RAC-CC).
- B. Arts & Sciences (RAC-AS).
- C. Urban Village (RAC-UV).
- D. Residential and Professional Office (RAC-RPO).
- E. Transitional Mixed-Use (RAC-TMU)—(RAC-EMU, RAC-SMU and RAC-WMU).

Sec. 47-13.1.2. List of Districts - South Regional Activity Center.

A. South Regional Activity Center South Andrews (SRAC-SA).

- 1. SRAC-SA(e)
- 2. SRAC-SA(w)

Sec. 47-13.2.1. Intent and purpose of each district.

A. Downtown Regional Activity Center (RAC).

...

B. South Regional Activity Center (SRAC)

- 1. South Regional Activity Center (SRAC). This land use designation applies to the geographical area containing a mixture of professional office, small to medium scale businesses, cultural and residential uses. The purpose is to foster an active pedestrian friendly environment while maintaining the established eclectic atmosphere of the area.
 - a. SRAC-SA is intended to promote an active urban environment with a mix of uses characteristic of the traditional character of the South Andrews neighborhood. To this end, the district will allow residential and mixed-use development to create a true urban area complete with both daytime and evening activity. This will be accomplished by requiring the following: high quality buildings with minimal setbacks and oriented to provide light and air at the street level, active occupied spaces at the ground floor and

enhanced streetscape consisting of tree-lined streets encouraging an active and comfortable pedestrian environment. Landscaping should be consolidated into useable park-like areas consisting of plazas and open space. On-site parking will be designed in such a way that the vehicle will be as imperceptible as possible and interference with pedestrian pathways minimized. Crime Prevention through Environmental Design (CPTED) principles shall be incorporated in the design of the streets, parking areas and public areas in a manner that makes the area less attractive to criminal activities. SRAC-SA has been further refined to distinguish between SRAC-SA east (SRAC-SAE) and SRAC-SA west (SRAC-SAW) zoning district.

- i. The SRAC-SAW zoning district is intended to be an area of more intensive uses consisting of heavy non-residential business uses, wholesale, warehousing, storage operations and establishments conducting activities of the same general character as well as those uses intended to meet the shopping and service needs of the community. Residential uses are permitted and encouraged to promote a diverse character. The SRAC-SAW zoning district is located west of those properties abutting SW 1st Avenue and follows the zoning line of the previous Heavy Commercial/Light Industrial Business District (B-3) zoning district of the area to the east portion of the FEC corridor.
- ii. The SRAC-SAE zoning district is intended to meet the shopping and service needs of the community as well as limited wholesale uses. Residential uses are permitted and encouraged to promote a diverse character. The SRAC-SAE zoning district is generally located within the same zoning boundaries of the previous Community Business District (CB) zoning district of the area.

Sec. 47-13.31. SRAC special regulations applicable to all SRAC zoning districts.

- A. Applicability.** The following regulations shall apply to development permitted within a SRAC zoning district as shown on the List of Permitted and Conditional Uses – Section 47-13.10.
- B. Density.** Density within the entire SRAC is limited in accordance with the number of units as provided in the adopted Comprehensive Plan.
 - 1. Density within the entire SRAC may be increased as provided in the Comprehensive Plan.**
 - 2. Dwelling units are allocated at the time of development plan approval. Upon expiration of a development plan the allocation of dwelling units shall terminate and such units shall be made available for future development.**
 - 3. The allocation of dwelling units shall be subject to all provisions of the ULDR applicable at the time of development permit approval when the dwelling units are allocated and subject to any conditions imposed by Broward County on**

the approval of the land use plan amendment that permits additional dwelling units including but not limited to conditions requiring affordable housing, student station fees or any other fees required to be collected as a condition of the allocation of dwelling units.

4. The dwelling units that are allocated to the SRAC as provided in the City's Comprehensive Plan are available in accordance with the ULDR applicable at the time a development plan application is submitted on a first come, first serve basis.
5. Dwelling units shall be allocated in the SRAC land use district in accordance with regulations adopted by City for the dwelling units allocated and no development shall be permitted unless and until the City adopts a zoning regulation addressing the allocation of the dwelling units identified in the City's Plan.

C. Streetscape Regulations and Classification.

1. The purpose of the streetscape regulations is to create a safe, comfortable and visually interesting experience for the pedestrian, thereby encouraging more street level activity by creating a well landscaped street corridor defined by a consistent streetwall.

The regulations are intended to accomplish streetscape goals by requiring or encouraging the following:

- a. Delineation of a streetwall through the limitation of space between buildings along the street.
- b. Enhancing pedestrian and vehicular safety through traffic calming measures and regulation of sidewalk width and quality as well as vehicular crossings and the location of off-site parking;
- c. Providing sufficient light and air through stepback regulations, while providing weather protection from rain and sunshine through the use of natural shade trees, canopies and awnings;
- d. Sidewalks that are safe to travel by regulating the width and quality of sidewalk and vehicular crossings, and the location of off-site parking;
- e. The provision of an interesting experience for pedestrian activity by locating non-residential, active uses on the first floor, principal building access to be oriented toward the street, requiring transparent glazing, architectural features or both on the first floor fronting of a building to front toward the street, and encouraging consolidated open areas along the street front along with street furniture.

- f. Permitting a mix of housing, retail and business uses that will create an active urban environment.
 - g. Light and view to those occupying a building above the 6th floor or 75 feet by requiring stepbacks at this height.
 - 2. Street Classifications. In the SRAC all streets are classified as primary or secondary. This classification is made according to various functional characteristics of the street such as width, traffic volume, and suitability for human-scale, pedestrian-friendly street life. The form of development that occurs on any given street is in part determined by the street classification. The regulations for development arising from street classifications encourage development of both sides of the street in a consistent manner.
 - a. Primary Streets: Primary streets are characterized by active commercial and retail frontage at the ground floor, taller and more intensive buildings fronting the street, and a consistent streetwall. Primary Streets typically feature a full complement of pedestrian amenities, including wide sidewalks, on street parking, and a well-developed streetscape, which may include open space for public use. Primary Streets are the principal urban streets and are intended to be well used by vehicles and pedestrians and to be the primary transit routes. In the SRAC, the Primary streets are:
 - i. South Andrew's Avenue
 - ii. Davie Boulevard
 - iii. South East 17th Street.
 - b. Secondary Streets: Secondary streets are more residential in nature, and have smaller scale non-residential uses transitioning between the more urban areas and the existing residential and commercial neighborhoods. Secondary streets offer a combination of a mix of uses, but at less intensity and with less vehicular traffic while maintaining a pedestrian friendly environment. Secondary streets are streets other than Primary Streets listed in subsection (a) above.
 - 3. The SRAC establishes development provisions intended to reinforce the qualities described for primary and secondary streets. For each street type, the right-of-way width and particular street section may vary depending on available space and other existing constraints.

Sec. 47-13.41-47-13.45. Reserved

Sec. 47-13.46. SRAC-SA special regulations.

A. Applicability. In addition to the regulations provided for development in SRAC zoning districts, the following additional regulations shall apply to all development permitted within the SRAC-SAw and SRAC-SAE zoning districts as shown on the List of Permitted and Conditional Uses, Sections 47-13.10.6. As used herein, the SRAC-SA Design Standards shall refer to the Illustrations of Design Standards on file with the Department and incorporated herein as if fully set out in those sections of the ULDR that refer to the SRAC-SA Design Standards.

B. Definitions.

For the purpose of sections 47-13.30 thru 47-13.47, the following terms are defined as follows:

1. Floorplate: The gross square footage (GSF) for any floor of a tower. Does not include balconies that are open on three sides.
2. Pedestal: The portion of a building extending from the ground to the shoulder.
3. Shoulder: The portion of a building below the horizontal stepback between a tower and a pedestal.
