**AGREEMENT FOR
CITY OF WEATHERFORD
ANNEXATION SERVICE PLAN FOR
"University Hills 2020"**

This Agreement is entered into between the City of Weatherford and Tremble, BGF, LLC, Ray French, pursuant to Section 43 0672 of the Texas Local Government Code for municipal services to the area annexed in the ordinance attached hereto. Services shall be furnished after the effective date of annexation by the City of Weatherford, Texas, ("City") at the following levels and in accordance with the following schedule:

1. **Services Currently Provided: Platting**
2. **Upon the effective date of annexation the City will provide the following services to the newly annexed area:**
 - A. **Police Services**
The City will provide police services to the newly annexed area at the same or similar level of service now being provided to other areas of the City with similar topography, land use and population. The City will respond to all dispatched police calls and requests for service or assistance within the newly annexed area.
 - B. **Fire Protection and Emergency Medical Service**
The City will provide fire protection to the newly annexed area at the same or similar level of service now being provided to other areas of the City with similar topography, land use, and population. The City will respond to all dispatched calls and requests for service or assistance within the newly annexed area.
 - C. **Solid Waste Collection**
The City will provide for the collection of solid waste and refuse in the newly annexed area at the same fee as paid by other citizens within the city limits for the same service by the franchised solid waste provider.
 - D. **Maintenance of Water and Wastewater Facilities**
The City Council is not aware of the existence of any water or wastewater facilities now located in or serving the area proposed for annexation. If publicly owned water or wastewater facilities do exist in the area such facilities owned or maintained by the City at the time of the proposed annexation shall continue to be maintained by the City. Any water or wastewater facilities, which the City may acquire subsequent to the annexation of the proposed area, shall be maintained by the City to the extent of its ownership. It is the intent of the City to maintain all public water and wastewater facilities in the annexed area that are not within the service area of any other water or wastewater utility. The City does own and maintain municipal water and wastewater service in existing phases of University Hills.
 - E. **Maintenance of Roads and Streets**
Road, streets, or alleyways which have been dedicated to the City or which are owned by the City shall be maintained to the same degree and extent that other roads, streets and alleyways are maintained in areas with similar topography, land use, and population density. Lighting of roads, streets, and alleyways that may be positioned in a right-of-way, roadway, or utility company easement shall be maintained by the applicable utility company servicing the City pursuant to the rules, regulations, and fees of the utility.
 - F. **Maintenance of Parks, Playgrounds and Swimming Pools**

The City Council is not aware of the existence of any parks, playgrounds or swimming pools now located in the area proposed for annexation. If parks, playgrounds, or swimming pools do exist and are public facilities, the City will maintain the areas to the same extent and degree that it maintains parks, playgrounds, swimming pools, and other similar areas of the City.

G. Maintenance of Publicly-Owned Facility, Building, or Municipal Service

The City Council is not aware of the existence of any publicly-owned facility, building, or municipal service now located in or serving the area proposed for annexation. If publicly-owned facilities, buildings, or municipal services do exist, the City will maintain the facilities and services to the same extent and degree that it maintains similar facilities and services in other similar areas of the City.

H. Electric

The City Council is not aware of the existence of City-owned electric facilities now located in and serving the area proposed for annexation. Any City-owned electric facilities that exist in the area at the time of the proposed annexation shall continue to be maintained by the City to the same extent and degree that it maintains similar facilities and services in other similar areas of the City.

3. Program for construction or acquisition of any capital improvements necessary for providing municipal service for the area:

A. In General

1. The City policy for extending water and wastewater service is to extend service on an as required basis when development applications or subdivision plats are submitted to the City in accordance with the City's subdivision and development ordinances and utility extension regulations.
2. Landowners may be required to fund capital improvements necessary to provide service in a manner consistent with Chapter 395, Texas Local Government Code. Nothing in this plan shall be interpreted to require a landowner within the newly annexed area to fund capital improvements necessary to provide municipal services in a manner inconsistent with Chapter 395 of the Local Government Code, unless otherwise agreed to by the landowner.
3. There appear to be no public improvements of any kind other than existing state and county roads presently located in the area to be annexed.

B. Police and Fire Protection Services

The City Council finds and determines it to be unnecessary to acquire or construct any capital improvements for the purposes of providing police or fire protection services and that it has at the present time adequate facilities to provide the same type, kind, and level of protection and service which is presently being administered to other areas already incorporated in the City with the same or similar topography, land use, and population density, without reducing by more than a negligible amount the level of police or fire services provided within the corporate limits of the City.

C. Water Facilities and Services

Municipal water service is available through an 8" water main located in the public right-of-way of Vanderbilt Drive on the southern boundary of the area proposed for annexation. Developer(s) will be required to connect to the water main and extend service(s) to the proposed development pursuant to the ordinances and utility policies of the City. Upon connection to existing mains, water will be provided at the rates established by the City.

D. Wastewater Facilities and Service

Municipal wastewater service is available through an 8" wastewater gravity main located along Vanderbilt Drive on the southern boundary of the area proposed for annexation. Developer(s) will be required to connect to the wastewater gravity main and extend service(s) to the proposed development pursuant to the ordinances and utility policies of the City. Extension of service may require new gravity mains, force mains, private grinder pumps, and/or a lift station, as required by the Weatherford Utility Department. Upon connection to existing system, wastewater will be provided at the rates established by the City.

E. Roads and Streets

When development occurs within the area, maintenance of properly dedicated roads and streets will be consistent with the maintenance provided by the City to other roads and streets in areas of similar topography, land use, and development as the annexed area. Developers will be required pursuant to the ordinances of the City to provide internal and peripheral streets and to construct those streets in accordance with the specifications required by the City for a properly dedicated street. The City will undertake to provide the same degree of road and street lighting as is provided in areas of similar topography, land use, and population density within the present corporate limits of the City.

F. Electric

The City does not have the ability to serve electric to the proposed annexation area as determined by its certified electric service territory granted by the Public Utility Commission of Texas.

SPECIFIC FINDINGS

The City Council finds and determines that this proposed Service Plan will not provide any fewer services, and it will not provide a lower level of service in the area, including maintenance of infrastructure, proposed to be annexed than were in existence in the area at the time immediately preceding the annexation process, or within areas of the corporate limits of the City with similar topography, land use and population density, nor will it result in reduction the level of fire and police protection and emergency medical services provided within corporate limits before annexation.

Because of the differing characteristics of topography, land utilization and population density, the service levels which may ultimately be provided in the newly annexed area may differ somewhat from services provided to other areas of the City of Weatherford, Texas. These differences are specifically dictated because of differing characteristics of the property and the City of Weatherford, Texas will undertake to perform consistent with this contract so as to provide the newly annexed area with the same type, kind and quality of service presently enjoyed by the citizens of the City of Weatherford, Texas who reside in areas of similar topography, land utilization and population.

All of these services will be available as of the effective date of the annexation.
