| The charges imposed as a part of this stormwater utility shall be derived from parcels net acreage and residential equivalency factor (REF). The REF is defined as the ratio of runoff volume generated by one acre of land to the runoff volume generated by one acre of low density residential land. The residential equivalency factors for each land use established as part of this stormwater utility shall be as follows: |            |
| <i>Land Use</i>   | <i>REF</i> |
| Low Density Residential   | 1.0        |
| Medium Density Residential  | 1.7        |

(REF)(Base Rate as established by the city council) = Rate per acre

Low density residential parcels shall be charged on a per lot 1/3 acre basis.

Medium density residential parcels shall be charged per lot based on a size of 0.15 acres.

All other land uses shall be charged on a per acre basis.
