

**BEFORE THE CITY COMMISSION
CITY OF STUART, FLORIDA**

ORDINANCE NUMBER 2426-2020

**AN ORDINANCE OF THE CITY OF STUART, AMENDING
ARTICLE III, SECTION 32-68 ALLOWING FOR THE TRANSFER
OF IMPACT FEE CREDITS; PROVIDING FOR A SEVERABILITY
CLAUSE AND A CONFLICT CLAUSE; PROVIDING FOR AN
EFFECTIVE DATE, AND FOR OTHER PURPOSES**

WHEREAS, the City Commission seeks to provide for regulation and use of development of land so that the new development bears its proportionate share of the cost of the capital expenditures necessary to provide facilities required to mitigate the impacts of the new growth; and

WHEREAS, the City Commission has determined that existing residential properties are deemed to have contributed impact fees based on the number of units; and

WHEREAS, the City Commission has determined that in certain circumstances redevelopment of existing residential properties may result in surplus units; and

WHEREAS, the City Commission believes that providing the opportunity for property owners to transfer surplus residential units may result in a reduction in housing costs; and

WHEREAS, the City Commission recognizes that current housing costs for both rentals and home ownership is becoming unattainable and therefore the Commission desires to provide assistance in those circumstances wherein there are surplus residential unit credits available; and

WHEREAS, the City Commission has determined that the proposed revisions are in the best interests of the general and serve as a public benefit.

NOW THEREFORE, BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF STUART, FLORIDA THAT:

SECTION 1: Chapter 32, Planning and Development, of the Code of Ordinances of the City of Stuart is hereby amended at Article III, Impact Fees, by including a new provision to read as follows:

Sec. 32-68. - Exemptions, credits, and deferrals.

(A) Exemptions. The following shall be exempted from the payment of impact fees:

(1) Alteration, expansion or replacement of an existing residential building where no additional living units are created, where the use is not changed, and no additional vehicular trips will be produced over and above that produced by the existing use.

(2) Alteration, remodeling or replacement of an existing nonresidential building or structure where the use is not changed, and the square footage and/or parking is not increased.

(3) The construction of accessory buildings or structures that do not create an additional impact on public capital facilities over and above that produced by the principal building or use of the land.

(4) An exemption must be claimed by the fee payer prior to the issuance of a building permit. Any exemption not so claimed shall be deemed waived by the fee payer.

(B) Credits.

(1) All reductions in the amount due for impact fees must be approved by the city commission.

(2) The value of any donation or dedication of public capital facilities above and beyond those improvements that are necessary for the project but have been required of the fee payer under a city development order shall be deducted from the impact fees otherwise due and owing for the project. In the event that the value of the donation exceeds the total amount of impact fee payments due for the project, there shall be no refund or transfer and the balance due for impact fees shall be deemed zero.

(3) The fee payer will provide the following information to the city manager for a determination of the value of any donation or dedication:

a. An independent property appraisal report prepared by an individual who is both a member of the Appraisal Institute (MAI) and a state-certified general appraiser acceptable to the city manager, containing the following:

1. Purpose of the appraisal.
2. Legal description of property, including a minimum of five years delineation of title.
3. Present use and zoning.

4. Utilities.

5. Type and condition of improvements and special features that may add to or detract from the value of the property.

6. Highest and best use of the property on which the appraisal is based before the acquisition of rights and interests to be acquired and the highest and best use of the remainder after the acquisition when a partial taking is involved. In either instance, if the existing use is not the premises on which the valuation is based, the appraisal will contain an explanation justifying the determination that the property is available and adaptable for a different highest and best use and there is a demand for that use in the market.

7. Before and after valuation as interpreted by state law will be used in partial donations or special benefits to the residue land or improvements.

8. Approaches to value including all applicable approaches to value. If an approach is not considered applicable, the appraiser must state why. All pertinent calculations used in developing the approaches will be shown.

(i) In the market approach, the appraisal report will contain a direct comparison of pertinent comparable sales to the property being appraised. The appraiser must include a

statement setting forth his analysis and reasoning for each item of adjustment to comparable sales.

(ii) Where the income (capitalization) approach is used, there must be documentation to support the income, expenses, interest rate, capitalization rate, discount rate, or any other factors used in the analysis. Where it is determined that the market rental income is different from the existing or contract income, the increase or decrease must be explained and supported by market information.

(iii) Where the cost approach is utilized, the appraisal report must contain the specific source of cost data, remaining economic life, and an explanation of each type of accrued depreciation.

9. Appraisal after value must be supported to the same extent as the appraisal of the before value. This support should include one or more of the following:

(i) Sales comparable to the remainder properties.

(ii) Sales of comparable properties from which there have been similar donations or acquisitions for like usages.

(iii) Development of the income approach on properties which show economic loss or gain as a result of similar acquisition or taking for like usages.

(iv) Public sales of comparable lands by the state or other public agencies.

(v) If the data described in subsections (b)(3)a.9(i) through (iv) of this section are not available the appraisal will so state and give the appraiser's reasoning for his value estimate.

b. The difference between the before and after appraisal will represent the value of property to be acquired including the damages to the remainder property. The appraiser will separately analyze and tabulate the difference showing a reasonable allocation of site improvements and damages.

c. Where two or more of the approaches of value are used, the appraisal will show the correlation of the separate indications of value derived by each approach along with a reasonable explanation for the final conclusion of value. This correlation will be included for both before and after appraisals.

d. All appraisal reports should include identified photographs of the subject property including all principal aboveground improvements or unusual features affecting the value of the property to be taken or damaged.

e. Appraisal reports will contain a survey and sketch or plat of the property showing boundary dimensions, location of improvements and other significant features of the property.

- f. Each appraisal report will contain or make reference to the comparable sales which were used in arriving at the fair market value. Comparable sales data must state the date of sale, names of parties to the transaction, consideration paid, financing, conditions of sale and with whom these were verified, the location, total area, type of improvements, appraiser's estimate of highest and best use at the date of sale, zoning, and any other data pertinent to the analysis and evaluation thereof. If the appraiser is unable to verify the financing and conditions of sale from the usual sources such as buyer, seller, broker, title or escrow company, etc., he will so state. Pertinent comparable sales data should include identified photographs of all principal above ground improvements or unusual features affecting the value of the comparable sales.
- g. All properties appraised and the comparable sales which were relied upon in arriving at the fair market value estimate will be personally inspected in the field by the appraiser and all dates of inspection will be shown in the appraisal report.
- h. The effective date to which the valuation applies.
- i. A statement of appropriate content and limiting conditions, if any.
- j. The certification, signature, and date of signature of the appraiser.
- k. Actual new build cost of facility may be used for determination of reductions.

(4) No value or amount shall be deducted from the amount of impact fees due for site-related improvements.

(C) Deferral or Reductions of impact fee payments for affordable housing.

(1) Deferrals or Reductions. Prior to the application for a building permit, builders of affordable housing for very-low-income, low-income, and moderate-income households may request that the payment of impact fees be reduced or deferred until the issuance of the certificate of occupancy or one year after the issuance of the building permit, whichever is earlier. This deferral or reduction is available only when the affordable housing has been certified by the city development director, as meeting the criteria established by the city for affordable housing. .

(2) Approval of deferrals or reductions will be made to applicants who meet the criteria and shall be determined on a case-by-case basis by the city manager.

(3) Reduced city road impact fees for "de minimus" projects within the city's community redevelopment area (CRA). Projects within the city's community redevelopment area (CRA) which are deemed to be "de minimus," that is ten residential units or less, 2,000 square feet of office space or less, or 1,000 square feet of retail space or less, or up to a 20-seat sit-down restaurant, are entitled to a 35 percent reduction in the city's multimodal impact fee.

(D) Transfer of City of Stuart Surplus Residential Units. The transfer of surplus residential units shall be permitted on a project-by-project basis subject to the following. *City of Stuart Surplus Residential Units shall be defined as all residential impact fees historically existing on a parcel of property that would have otherwise been available to use*

as a set off toward the cost of impact fees that may have been due or payable when redeveloping the property.

(1) A request to permit the transfer of surplus residential units, if any, shall be submitted simultaneously with the property owner's application for Development Order or Permit in the event of straight zoning applications.

(a) All requests to permit the transfer of surplus residential units shall be approved by the City Commission.

(b) Untimely request shall not be considered and shall be deemed waived.

(2) The City shall establish an account in the name of the owner of the record and document the account so that it accurately reflects the surplus residential units to the parcel of land which is the subject of the City Resolution as determined by the City Commission. In the event the owner of record desires to transfer any portion of the surplus residential units to another parcel, and the City Commission has previously approved the number of surplus residential units by resolution, the owner of record shall submit a notarized affidavit to the City Manager or designee indicating which parcel will be the recipient of the surplus residential units.. Upon receipt of the notarized affidavit and payment of the administrative fee, the surplus residential units shall be transferred to a similar account established for the transferee parcel. The applicant shall pay an administrative fee of \$2,000 (two thousand dollars) at the time of transfer.

(3) The transfer shall become effective upon issuance of a written confirmation or receipt by the City that the surplus residential units have been distributed from the original parcel to the new parcel.

(4) In no event shall the transferee be entitled to further transfer those same units to a second parcel. ¹

(5) All other provisions, policies and procedures that are applicable to the payment of impact fees shall be applicable to the transfer of surplus residential units.

(E) Procedure for Transfer: No surplus units shall be transferable until such time as the City Commission has passed a Resolution approving the transferability of the excess units.

(1) The Resolution shall identify the original source of the surplus residential units.

(2) The Resolution shall determine the number of excess units and provide a basis for this determination.

(a) It is the intention of this section that the resolution provide detailed information pertaining to the calculation of the excess impact fees.

(3) At no time shall the number ever exceed the original units and impact fees determined for the parcel.

(4) Unused units shall not be refunded. If surplus residential units are assigned or transferred to a new parcel, there shall be no claim for refund if the transferred value isn't used at the time of the issuance of the permit. Upon issuance of the permit, the parcel that has received a transfer shall be deemed to have zero remaining units.

(F) Expiration of Impact Fee units. Unless a longer time period is specifically authorized by the City Commission in a development approval all surplus residential units determined by

¹ The legislative intent is to allow transfers to more than one location but only allow the transfer to occur one time. For example, if parcel A has 10 surplus units, it can transfer 4 units to parcel B, 4 units to parcel C and 2 units to parcel D. But, the 4 units that were transferred to parcel B could not be used to create surplus units on parcel B nor could they be transferred from parcel B to any other parcel. Therefore, if the owner of parcel A inadvertently transferred too many units to parcel B and the excess units were not used in the development, they would expire because they have already been transferred once. On the other hand, Parcel A could transfer 2 units to parcel B and then at another time transfer 2 more units to parcel B and again transfer 2 more units to parcel B as long as the units being transferred had originated on parcel A and had never been transferred before.

resolution of the City shall expire at the end of 10 years from the date of the resolution authorizing them.

SECTION 2: All ordinances or parts of ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION 3: If any word, clause, sentence, paragraph, section or part thereof contained in this Ordinance is declared to be unconstitutional, unenforceable, void or inoperative by a court of competent jurisdiction, such declaration shall not affect the validity of the remainder of this Ordinance.

SECTION 4: This ordinance shall be codified.

SECTION 5: This ordinance shall take effect upon adoption.

Passed on first reading the 13th day of January, 2020

Commissioner Bruner offered the foregoing Ordinance and moved its adoption. The motion was seconded by Commissioner Glass Leighton and upon being put to a roll call vote, the vote was as follows:

MICHAEL J. MEIER, MAYOR
EULA R. CLARKE, VICE MAYOR
BECKY BRUNER, COMMISSIONER
