(10) Construction Water Accounts

All potable water used for construction purposes or any other approved purpose on a project must pass through a meter with an approved backflow prevention device.

Residential construction water accounts will be established after an account has been established. Whenever possible a residential construction meter will be installed in the location of the permanent location.

Commercial construction water accounts will be established after an account has been established. Construction water may be provided through an existing fire hydrant that is located in the public right of way within the limits of construction. The City will install construction meters on specific hydrants and the Customer will be billed for all appropriate fees. The installed meter shall not remain in service at any one location for more than one (1) year.

August 8, 2016

Construction meters may only be moved by City personnel. "Construction water" may be used for non-potable applications such as temporary irrigation, testing of internal plumbing systems, flushing toilets in model homes, construction and/or sales trailers.
