

ORDINANCE NO. 40

AN ORDINANCE STIPULATING THE METHOD OF HOUSE NUMBERING AND
RESPONSIBILITY THEREOF

BE IT ORDAINED by the mayor and council of the City of Bryant, Arkansas;

Using Main Street viaduct over the Missouri Pacific Railroad as a hub, number east and west of a straight line to the north and south from the viaduct, also number north and south of a straight line to the east and west from the viaduct.

Odd numbers will be assigned to left and even numbers will be assigned to right as one moves from hub or index lines.

Each block will take one hundred (100) numbers, starting with 101 from hub or index line; that is, 101 - 102; 117 - 118; 201 - 202; 217 - 218, etc.

Each house or establishment will be assigned a number in accordance with its position in the block, using sixteen (16) numbers for each fifty (50) feet of frontage in the block. On some future date, it may become necessary to break this down by number and front footage, but it still will be necessary to stay within this number footage ratio.

This numbering shall be performed by a party or by parties assigned by the mayor of the City of Bryant, Arkansas, until such time as it will be practical to employ a city engineer, who should then take over the responsibility.
