From and after the effective date of this Ordinance, existing Subsection (d) of Section 6.06.005, "Specific conditions and cross-connection controls," of Article 6.06, "Irrigation Systems," of Chapter 6, "Health and Sanitation," of the Town's Code of Ordinances is hereby repealed in its entirety and replaced with a new Subsection (d), to read as follows:

- "(d) If an irrigation system is designed or installed on a property that is served by an on-site sewage facility, as defined in Chapter 285 of Title 30, Texas Administrative Code, then:
- (1) All irrigation piping and valves shall meet the separation distances from the on-site sewage facility system as required for a private water line in Texas Administrative Code, Title 30, Section 285.91(10).
  - (2) The irrigation system is designated a health hazard and any connections using a private or public potable water source shall be connected to the water source through a reduced pressure principle backflow prevention assembly, as defined in Texas Administrative Code, Title 30, Section 344.50.
  - (3) Any water from the irrigation system that is applied to the surface of the area utilized by the on-site sewage facility system shall be controlled on a separate irrigation zone or zones so as to allow complete control of any irrigation to that area so that there will not be excess water that would prevent the on-site sewage facility system from operating effectively."
